Professional Summary

Detail-oriented 3rd-year Computer Science Undergraduate at the University of Sri Jayewardenepura, part of the inaugural cohort. Co-author of research in data-driven financial modeling for large-scale events. Proficient in full-stack development, system analysis, and software quality assurance. Active IEEE member with a focus on leveraging emerging technologies to drive business sustainability and operational efficiency.

Education

BSc (Hons) in Computer Science

University of Sri Jayewardenepura | 2022/2023 Intake (Inaugural Cohort) – Present

- Maintained an 80% mandatory attendance rate, demonstrating strict academic discipline.
- Relevant Coursework:** Software Architecture and Design Patterns, Artificial Intelligence, Database Management Systems, Data Structures and Algorithms, Software Quality Assurance.

Technical Skills

- Programming Languages:** Java, Python, JavaScript, C++, SQL.
- Frameworks & Web:** React, Spring Boot, Node.js, HTML5, CSS3.
- Tools & Software:** MS Project, Primavera, Git, LaTeX.
- Theoretical Proficiencies:** Software Architecture, Artificial Intelligence, Statistical Inference, Database Systems.

Project Experience

Course Registration System (Educational Sector)

- Designed an educational platform for real-time course enrollment and academic progress tracking.
- Implemented prerequisite verification logic and automated scheduling features to optimize administrative efficiency.

Online Pizza Ordering Platform (E-commerce Sector)

- Developed a full-stack minimum viable product (MVP) utilizing React for the frontend and Spring Boot for the backend.
- Engineered transaction management features to handle orders, customizable product attributes, and secure checkout processes.

Research & Quantitative Modeling

Profit Analysis of an Annual University Talent Show: A Data-Driven Analysis

- Co-authored research submitted to the 1st Jayewardenepura Computing Symposium 2026.
- Developed a quantitative framework and sensitivity testing using MS Project to evaluate financial risks.
- Analyzed fiscal dependencies and revenue streams to present actionable profitability strategies.

Optimizing Greenhouse Conditions for Maximum Crop Yield (Statistical Research)

- Analyzed environmental impacts on Sri Lankan tomato yields using Python (Pandas, NumPy, SciPy).
- Applied hypothesis testing and linear regression to identify statistically significant climate drivers.
- Developed quantitative models for precision agriculture to optimize crop resource allocation.

Professional Development & Certifications

- AI/ML Engineer - Stage 1 | SLIIT Faculty of Computing (Dec 2025):** Comprehensive program covering the theoretical foundations of AI & ML with practical, hands-on application in TensorFlow, PyTorch, and Artificial Neural Networks. (Credential ID: wz4emxfzv4)
- Web Design for Beginners | University of Moratuwa (Faculty of IT) (Jan 2024):** Foundational certification in front-end web development, covering HTML, CSS, and JavaScript via the Centre for Open and Distance Education. (Credential ID: REbnOKYGg7)
- IEEE Student Branch (USJ) (2025):** Active member; participated in inter-university problem-solving competitions like AlgoArena 2025 and engaged in high-level tech seminars, including TechXplore on Quantum Computing.
- Artificial Intelligence & Machine Learning Certification | SKYREK (Dec 2025):** Advanced training focused on Large Language Models (LLM), Reinforcement Learning, and Unsupervised Learning. Recognized with a Certificate of Excellence for the final AI/ML project. (Credential ID: SKML25940)
